

Title of Project: National Means Cum Merit Scholarship (NMMS Project)

Organised by: Project S.E.V.A.

Duration: 5 months and ongoing

Report of the project

Project S.E.V.A. collaborated with the NGO-Youth for Seva in their flagship project- NMMS(National Means Cum Merit Scholarship) training.

NMMS is a centrally sponsored scheme which aims at reducing school dropout rates among government school students. Every year a scholarship test for class 8th students is held and if they clear the exam, they get a scholarship of 1000₹ p.m for the next 4 years. The project started in October 2021 and Project Seva volunteers provided online coaching to students through Google meet, with the help of learning modules provided by the NGO.

Under this project, our college volunteer named Monika Malhotra conducted a total of 30 sessions for children from the deprived sections of the society. The duration of each session exceeded one hour and was conducted in the online mode. She mentored the children through interactive video lectures and presentations on several topics, namely- Venn Diagram, Analogy, Coding-Decoding and Word Problems.

She was helped by two volunteers- Nishchay for doubt sessions and Vanshika Arora for assisting with the sessions. Our volunteers conducted insightful sessions to guide the children on how they can solve complex problems in a fraction of seconds. The children were very eager to learn and passionately interacted with our volunteers and asked their doubts regarding the topics they were taught. Their creative participation nurtured a sense of togetherness.

Overall, the project was a learning experience for both students as well as volunteers. The children gained knowledge on different topics which proved to be fruitful for them. Volunteers enhanced their teaching skills and also gained confidence in expressing their point to view to others.
